## DETAILED ACTION

### ***Allowable Subject Matter***

Claims 1-24 are allowed in view of the Applicant's arguments (Response filed 3/6/06, 7/19/05, 2/1/05) and the cited prior art of record. The independent claims recite document retrieval, including receiving a request email message from a requesting device for a document, the request email message including a destination address for which the document is to be sent, the destination address being either an originator address or a forwarding address, the forwarding address comprising a printer alias associated with a print agent to which a forwarding email message is to be sent, the print agent being configured to orchestrate a printing of at least one document attached to the email on a printer, automatically generating the forwarding email message with the document attached in response to the request email message, forwarding the message to the forwarding address, the forwarding email message being formatted so as to be recognizable by the print agent that accesses the at least one document attached thereto, automatically generating a reply email message with the document attached if the destination address is the originator address, and automatically transmitting the email message containing the document to destination address, which is either the forwarding address or the originator address, which, in addition to the rest of the claim limitations, are distinguished from the prior art. For support, see Instant Specification (p4, lines 12-30, p5, line 30 through p6, line 15, p8, lines 20-35, p9, lines 18-30).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
